

RAJAT BHANDARI

Senior Lead UX Designer | Acting Design Manager | Enterprise Platforms & Design Systems

Bengaluru, Karnataka, India • [LinkedIn](#) • [Portfolio](#) • rajatbhandari46@gmail.com • +91 7597347948

EXECUTIVE SUMMARY

Strategic Design Leader with 10+ years of experience in product design, including 3 years in Design Management directing organizations of 23+ designers, and 4+ years as a Design Lead. Deeply specialized in enterprise B2B SaaS, US Healthcare software ecosystems, and high-scale sales platforms. Expert in leading 0 to 1 digital transformations to convert complex manual workflows into automated digital products. Works at the intersection of people leadership and hands-on architecture, driving design operations including structured hiring loops, career pathing, strategic resource allocation, and executive client relations while building design systems that scale across large organizations.

CORE COMPETENCIES & TOOLCHAINS

- Research & Design Practice: User Interviews, Contextual Inquiry, Surveys, Focus Groups, Card Sorting, Usability Testing, A/B Testing, Heuristic Evaluation, UX Audits, Personas, Customer Journey Mapping, Prototyping, Design Sprints, Workshops, Lean UX, User-Centered Design (UCD), Double Diamond, Interaction Design, Design Thinking.
- Leadership & Strategy: Design Org Scaling, People Management (Leads, Seniors, Mids), DesignOps, Structured Interview Loops (100+ screened, 14 onboarded), Performance Management, Product-Eng-Design Triad Alignment.
- Systems & Architecture: Enterprise UX Architecture, Micro-Frontend (MFE) Modularity, Design System Governance, Multi-Tenant Token Hierarchies, Semantic State Taxonomy, Dark Mode Engines, Information Architecture.
- Platforms & Tooling: Figma Enterprise (Tokens, Variables, Auto Layout), Miro, FigJam, Jira, Confluence, SharePoint, Zeplin.
- AI & Agentic Toolchains: Google Antigravity, Devin, Claude, Microsoft Copilot, Agentic Workflows, AI-Assisted Prototyping.

PROFESSIONAL EXPERIENCE

UST Global, Senior Lead UX Designer | Acting Design Manager

Oct 2022 – Present | Bengaluru, India

Dual Mandate: Operating as Organizational Design Manager leading people and capability strategy for 23 designers at UST, while concurrently serving as embedded Principal Product Designer driving core platform architecture at Dell Technologies.

Team & Org Leadership

- People & Team Leadership: Function as design manager for a **23**-person design organization (**4** Leads, **10** Seniors, **9** Mid-level) spanning enterprise B2B SaaS and healthcare platforms, owning hiring, career development, performance calibration, and workload distribution across the group.
- Structured Hiring & Retention: Ran hiring loops end-to-end, screened **100+** candidates and onboarded **14** within budget, with high retention to date.
- Aakar Capability Framework: Self-initiated a **14**-month internal L&D programme for **22** designers, building **4** cross-seniority knowledge groups (Design Philosophy, AI & Tools, Craft & Tooling, Process & Accessibility); ran weekly rotating-presenter sessions, aligned all Workday SMART goals to group domains, and co-built a reusable internal UX course with the team. Results: client scores lifted from **3.5** to consistently **above 4.0**, **2** senior promotions, **1** client account conversion, high designer satisfaction on internal surveys, and the UST Shining Star Award.
- Hyderabad Center Portal: Led design and development of the employee portal on SharePoint as part of a UST Global modernization initiative, replacing an outdated legacy portal for **3,000+** employees; received positive recognition from senior leadership.

Embedded Platform Work: Client Dell Technologies

- Pre-Purchase Intelligent Automation (PO Suite): Architected 3-way automated reconciliation workflows in the PO Assistant tool and modernized high-density PO directories, cutting order-creation turnaround time by **63%** (**9.30s** to **3.45s**) for **1,000+** daily global operators across EMEA, APJ, US, and Canada.
- Enterprise Architectural Convergence (TPX, Seller Path): Led UX audit and end-to-end redesign of the global Order Details Page, a mission-critical operational hub processing Dell's entire post-purchase pipeline and supporting **\$113.5B** in annual revenue (FY26).
- High-Density Workflow Optimization: Restructured complex information architecture using progressive disclosure for **50,000+** active operators across **10+** distinct personas; engineered one-click bulk fulfillment editing that compressed multi-step legacy workflows into a single action, reducing decision time and cognitive load at scale.
- Multi-Tenant Design System & Dark Mode: Led system-wide architecture across **30+** enterprise products and **150+** teams; engineered an achromatic #171717 dark-mode palette, cut **1,000+** lines of CSS debt, achieved **100%** WCAG AA compliance, and drove a **136%** adoption surge by anchoring token health to executive Product Health Scores.

- Dell Internal Feature Toggle Tool: Redesigned the internal feature management tool to align with Dell's latest design system standards; introduced new capabilities, improved accessibility compliance, and received strong positive feedback from engineering teams on usability and developer experience.

Mirra Healthcare Pvt. Ltd., UX Lead

Aug 2019 – Aug 2022 | Bengaluru, India

Directed a 10-person design team (4 Seniors, 4 Mids, 2 Interns) owning the digital product portfolio across the US Healthcare trifecta (Payer, Provider, Patient).

- Workflow Digital Transformation: Led zero-to-one replacement of manual spreadsheet operations with automated enterprise portals, delivering a **90%** efficiency improvement across patient census tracking and value-based care management (BPCI).
- Provider Credentialing & Onboarding: Re-engineered the end-to-end credentialing ecosystem, cutting onboarding cycle time by **40%**; architected a unified, HIPAA-compliant design system across **8+** enterprise products including telephony, billing, and claims adjudication.
- Clinical & Regulatory Compliance: Partnered with healthcare administrators and medical directors to ensure HIPAA, CMS, and PHI compliance across all digital touchpoints.

K-Arogia Advisory Services, UX & UI Designer (Sole Designer)

Sep 2018 – Aug 2019 | Bengaluru, India

- Post-Discharge & Clinical Tools: Conceptualized and shipped end-to-end operational software for hospital networks as sole designer, including clinical analytics dashboards and the "3-2-9" post-discharge care management tool.
- Telehealth Interface Redesign: Conducted contextual inquiry, operator interviews, and call audits with telehealth agents; identified a disconnect between verbal intake scripts and software data entry, and redesigned the interface to mirror conversational triage flow, cutting call-handling friction and cognitive load.

Kansoftware, Android Application Developer

Mar 2018 – Jun 2018 | Udaipur, India

- Jival Mobile App: Built native client UI for a regional Udaipur mobile app, establishing practical engineering foundations across mobile component lifecycles and layout performance.

Obbserv Online Services, Android Developer to Founding UI/UX Designer

Mar 2016 – Jan 2018 | Udaipur, India

- GoodDot (0 to 1 Launch): Served as the first UX designer for India's pioneering plant-based meat alternative brand, architecting v1.0 of the consumer e-commerce web platform, informational product catalog, storytelling narrative, and conversion checkout funnel from the ground up.
- Developer-to-Designer Pivot: Transitioned from Android engineering into full-stack product design within 3 months, owning UI/UX delivery for production client applications including Visca and Metoo.

HONORS & AWARDS

- Executive Top Talent Recognition (Talent Spotting Program 2025): Nominated and selected across UST Global for strategic leadership impact and strong delivery track record.
- UST Shining Star Award: Conferred for organizational leadership in designing and executing the Aakar Capability Framework.
- 5x USTAR Excellence Awards: Awarded across 5 separate enterprise engagements at UST for exemplary product architecture, client satisfaction, and technical delivery.
- Most Productive Team Award: Recognized as the most impactful product designer in the team at Obbserv Online Services.

PROFESSIONAL DEVELOPMENT & SPECIALIZED TRAINING

- Executive Leadership & Business Acumen Track (UST Global): Intensive leadership development covering stakeholder management and commercial strategy.
- Enterprise Digital Accessibility Curriculum (Dell Technologies): Comprehensive training covering WCAG 2.1 AA/AAA, token governance, and screen-reader standards.
- Agentic AI & Autonomous Developer Workflows: Hands-on work with agentic AI platforms including Google Antigravity, Devin, Claude, and Microsoft Copilot for prototyping and workflow automation.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering

Pacific Institute of Technology, Udaipur, Rajasthan, India | 2012 – 2016
